
6.0 SURVEYING GRAVEL PILES/PITS

Personal Protective Equipment (PPE) required.

- Hard hat
 - CSA Boots
 - Hearing protection if necessary
 - Safety Vest
- A Hazard Assessment is mandatory before beginning work on a gravel pile/pit.

Note: Under no circumstances will a crew measure in the presence of a vertical/near vertical cliff or cutaway.

Safety precautions to be taken when surveying a gravel pile:

- Be aware and exercise extreme caution when working in the vicinity of heavy equipment.
- If pile has been excavated, be careful when approaching vertical embankments (from above and below)
- When climbing pile, ensure that you have stable footing. Be aware of icy patches.

Gravel Pit:

- Watch for operating equipment
- Be wary when approaching edges of pit, bank may be undercut and may fall away (applies from above and below)
- If surveying in winter, watch for icy areas
