Experience Summary

Darrin's career at Beairsto Lehnert Ketchum began in 1984 in the position of instrument man. After a brief stint away from B.L.K. Engineering working in the oilfield doing general field maintenance and construction, he returned to B.L.K. and quickly moved into the position of crew chief. Darrin currently holds the position of Field Crew Supervisor and oversees all subdivision, civil engineering and municipal survey projects. Darrin also drafts the majority of the company's road plans and supervises the legal surveys.

Representative Projects

La Glace Gas Plant – Client (Conwest) – Municipality (MD of Saddle Hills).

Darrin acted as the chief surveyor for this project during construction from initial start up to as-builts. Surveying primarily involved construction and precision surveying as well as all the necessary site grading. Construction spanned an eight month period.

Isolated Boundary Survey/Nunavut Land Claim – Client (N.T.I. Inuit Owners) – Municipality (Province of Nunavut). Project surveyor for twenty-seven land parcels surveyed for isolated boundary corners. Involved the boundary identification of treaty parcels in the north. Logistics and safety were of prime importance in completing this job. Global Position System was utilized in the survey.

Heart River Dam Study – Client (Alberta Environment) – Municipality (M.D. of Big Lakes). Involved gathering hydrographic and topographic survey data for Alberta Environment. Looked at the impacts of flooding in the event of a catastrophic failure.

Muskeg River Tar Sands – Client (Stewart Weir) Involved in the construction surveying for the Muskeg River Tar Sands. Included staking and grading projects.

Highway 40 Road R/W – Grande Prairie to Grande Cache Involved in the definition of boundaries and the re-establishment of the same for a Road R/W. Included the re-posting of the pins and the registration of the plan once the work had been completed.
